

AAS Construction

AAS Construction pioneers innovative building solutions, excelling in steel construction, advanced prefabrication, and the transformative art of cargotecture. Our expert contracting services ensure seamless project execution, delivering unparalleled efficiency and quality from concept to completion.

About Us

Since incorporation in January 2021, our bespoke construction systems have over the years been deployed for office and residential projects, warehouses, banks, modular ATM shelters and technical support structures across Nigeria.

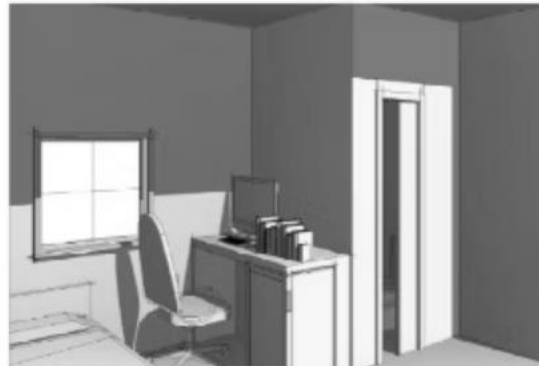

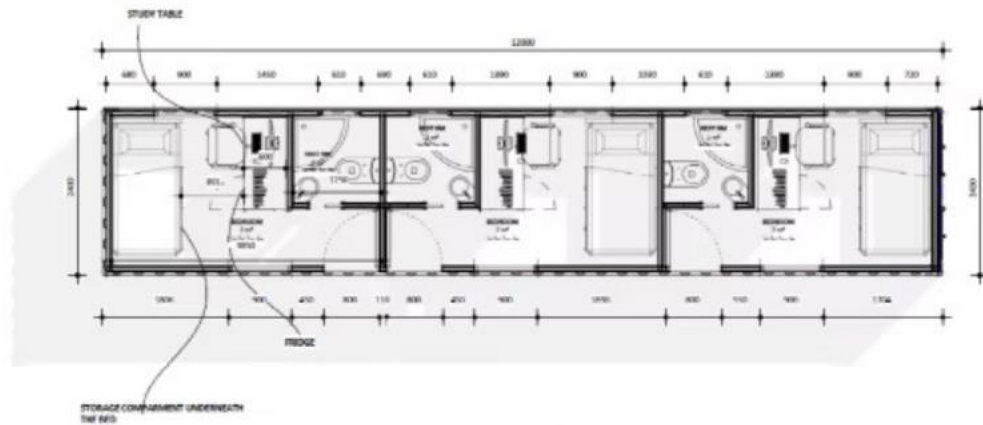

With a team of designers, technicians and fabricators, we're able to deliver projects in any part of the country offering our extensive experience in tandem with our cost effective systems and solutions.

Cargotecture

We remain one of the foremost companies delivering cargotecture projects around the country. We are able to upcycle shipping containers into functional habitable structures for use as offices, residences and more. This construction system provides a strong, durable and cost effective alternative to traditional construction methods saving both time and labour.

FLOOR PLAN & 3D DRAFT

Construction & Prefabrication Services

Construction

From new builds to renovation projects, we deliver construction projects of exceptional quality on time and on budget. We are proficient in concrete, masonry as well as steel construction, providing bespoke solutions to

Prefabrication

Our prefabricated, insulated wall panels offers an indigenous solution to indoor cladding needs. They are made from a fusion of three materials in one single unit guaranteeing resistance against fading, weather resistance and ease in

Specialized Services

Architectural & Engineering Design

We provide innovative architectural and engineering designs, blending creativity with functionality to meet the highest industry standards.

Quantity Surveying & Cost Management

Our cost management services ensure budget efficiency, offering accurate cost estimation, procurement planning, and financial control for construction projects.

Joint Ventures

We collaborate with investors and partners to co-develop real estate projects, leveraging shared resources to create high-value developments.

Warehousing Projects

Our warehousing projects showcase our expertise in delivering large-scale, functional storage and logistics facilities designed for efficiency and durability.

MPL Comm Centre

The MPL Comm Centre project demonstrates our capability in delivering comprehensive commercial communication infrastructure facilities with modern design and robust construction standards.

Medical Centre Project

Developed in partnership with THN, our Medical Centre project exemplifies our commitment to delivering specialized healthcare facilities that meet stringent medical standards and operational requirements.

Our Commitment to Excellence

At AAS Construction, we combine our extensive experience with cost-effective systems and solutions to deliver projects that exceed expectations. Whether through innovative cargotecture, precision construction, or comprehensive turnkey solutions, we remain dedicated to transforming building concepts into reality across Nigeria.
