## ABOUT THE BRAND

AAS Fortis is an indigenous oil & gas servicing company providing a vast range of services ranging from: marine support operations, maritime security, vessel chartering, Procurement and marine consultancy.

We are a solution-oriented and performance driven company, committed to the challenges faced in the maritime/oil and gas industry, as we offer innovative and unparalleled solutions to mitigating the risks associated with carrying out business operations in Nigeria.

With a team of highly skilled professionals that possess an in-depth knowledge of the best maritime practices, and marine support operations, we are keen to ensure excellence and efficiency in maritime operations and safeguard critical assets and infrastructure utilizing the most effective and efficient approach.

1

## OUR MISSION & VISION

Dedicated to providing critical maritime assets on demand, including required equipment and parts to the oil and gas industry.

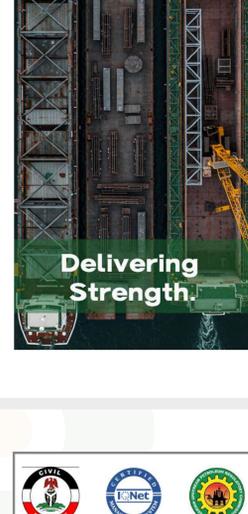

To lead technological integration in marine operations and become the preferable partner of choice in the provision of maritime services

## OUR CORE VALUES

Integrity: Honesty and transparency of all our business activities and ensuring service is delivered in strict adherence to the highest possible standard.

Result-Oriented: Providing innovative solutions through proactivity

Flexibility: Ability to respond to change and agility to sustain operations during difficult times.

2

## OUR APPROACH

As a company with a reputation for excellent services, we have continuously developed our capabilities and positioned ourselves in the industry, with the utilization of cutting-edge technology and a dynamic work force.

We strive to exceed clients request by going above and beyond to improve and strengthen marine support operations in the maritime industry dedicating our attention to:

- 1** Reduction of downtime in operations through efficient maritime support operation
- 2** Provision of essential marine assets to ensure the facilitation of trade and
- 3** Provision of a well-equipped team with sufficient intelligence of the maritime domain to enhance effective service delivery.
- 4** Ensure the provision and effective management of critical assets offshore

3

## COMPLIANCE

AAS is committed to the preservation of its reputation and integrity through compliance with applicable laws, regulations and ethical standards in our business operations.

All employees are expected to adhere to these laws, regulations and ethical standards, and management is responsible for ensuring such compliance

To underline the importance of this commitment, we have formulated our position on legal requirements and ethical issues in our globally applicable Code of Business Conduct, which serves as a guide to our behaviour in business dealings.

Our ethics and compliance efforts are supplemented by a Speak Up system. Employees, business partners, as well as third parties have the opportunity to voice concerns or report irregular behaviour at any time.

- 1** We expect everyone with whom we are associated to comply with all state and federal laws and regulations as well as our internally published policies and procedures.
- 2** Our Compliance Plan is designed to discover, remedy and deter non-compliant, unethical, unlawful or criminal conduct and helps ensure we conduct our business and provide our services in a legal and ethical manner.
- 3** We encourage ongoing internal analysis of our organization Policies and Procedures and conduct effective self-monitoring and internal reporting to ensure their efficient and effective operation.

4

## OUR SERVICES

AAS offers a vast range of procurement services to support the international oil and gas, National Oil, and gas sector as well as the public sector.

Our procurement services are designed to assist these companies with limited resources or experience to source the best onshore and offshore equipment to suit their requirements.

Our experience and network with industry giants globally provides us with access to vendor and equipment selection and solution support.

### Why use AAS procurement services?

- 1** Gain access to AAS Marine Services global network.
- 2** Avoid the risk of purchasing equipment that suffers from prototype failures by sourcing only durable and verified equipment.
- 3** Reduce the time needed to make a trusted investment decision.
- 4** Eliminate lengthy processes of requests for information (RFIs), request for proposals (RFPs), request for quotation (RFQs) before purchase from OEMs

5

## MARINE PROCUREMENT SOLUTIONS AND LOGISTICS (FREIGHT FORWARDING)

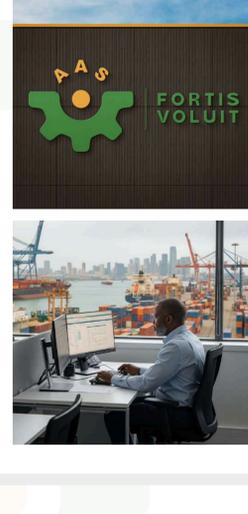

We supply: Pipes, pumps and valves, Storage Tank Equipment, Equipment and Instrumentation, Mechanical and Electrical Supply, Components, Safety Wears

### MARITIME SECURITY

Leveraging on our partnership with the Nigerian Navy, AAS Fortis Voluit is able to provide bespoke security escort vessels (SEVs) and deploy armed naval personnel on-board vessels for security surveillance and bridge protection. AAS is committed to ensuring our security services are delivered in accordance with global standards on safety and compliance at cost-effective and transparent approach.

With our operations team available 24/7/365, we offer continuous support and have robust plans in place to mitigate any related issues effectively. We prioritize the safety and security of our clients personnel and assets by monitoring and providing.

- 1** Client's vessel movement and activity
- 2** Route Risk Assessments
- 3** Piracy Intelligence updates

6

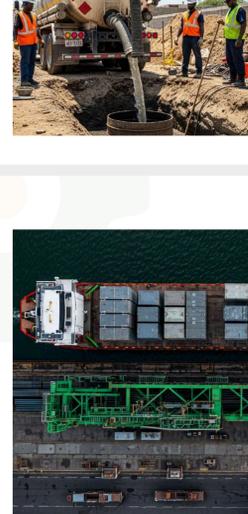

## PORT FACILITY SECURITY ASSESSMENT

As a recognized security organization, we carry out Port Facility Security Assessment (PFSA) to safeguard critical assets and infrastructure. For our comprehensive assessments, we first identify and evaluate important assets and infrastructure to understand their significance in the port facility's operations and security framework.

We then assess potential threats to these assets, evaluating the likelihood of these threats and establishing a robust security strategy to mitigate risks effectively.

Based on this threat assessment, we identify, select, and prioritize countermeasures and procedural changes to enhance security levels, reduce vulnerabilities, and address potential weaknesses.

Our evaluation also covers all aspects of infrastructure, including operational procedures and security protocols, examining human factors, policies, and procedures to identify exploitable weaknesses.

7

## MARINE LOGISTICS SUPPORT

We provide Offshore Support Vessels (OSVs) to our clients for marine logistics support operations, we support every stage of offshore exploration and production including conveyance of product, equipment and personnel from shore to offshore locations.

We have at our disposal, the technology to deliver prompt and efficient services within our region of operations and the expertise to provide inland barge services through our partners with unbroken focus on reducing wait times to access port.

### Our range of OSVs include:

- 1** Platform Supply Vessels
- 2** Anchor Handling Tugs
- 3** Line Handling Tug Supply
- 4** Crew Supply Vessels
- 5** Fast Supply Intervention Vessel
- 6** Utility Supply Vessels
- 7** Houseboats
- 8** Tug

8

## MARINE CONSULTANCY/ OPERATIONS

At AAS, we specialize in providing marine consultancy and operational management tailored to meet your needs. Our experienced team delivers end-to-end solutions designed to enhance the reliability, effectiveness, and efficiency of your operations.

### Our services include:

- 1** Manpower Services: We provide highly trained and experienced personnel, including engineers, technical experts, and operational staff to support and manage your projects. Our team is equipped with the expertise to support your operations with the right personnel, ensuring that you have the necessary manpower to meet your operational demands efficiently.
- 2** Technical & operational Management: we oversee all technical aspects of vessel operations to ensure optimal performance and compliance. Managing daily vessel operations to maximize efficiency and safety, leveraging our extensive industry knowledge and experience.

9

## RISK MANAGEMENT/SURVEILLANCE

We understand the ever-present challenges in the maritime industry. As a leading provider of integrated security solutions, we offer a comprehensive approach to mitigating risk and protecting your people, assets, and reputation.

We provide advanced vessel movement and activity monitoring systems that offer real-time tracking and analysis, allowing us to identify issues, detect potential risks, and ensure adherence to safety protocols and regulations.

Our team performs detailed route risk assessments using historical data, weather patterns, and threat intelligence to optimize routes and enhance operational efficiency. We also provide regular piracy intelligence updates, providing updates on the latest trends and mitigation strategies to safeguard your assets and personnel in the Gulf of Guinea.

In the event of a security incident or crisis, our team is prepared to respond swiftly and effectively, with established protocols for incident management and coordination with authorities. We are committed to enabling safe and efficient operations for all our clients.

10

## BESPOKE PROJECTS (SEWAGE EVACUATION)

We specialize in providing tailored sewage evacuation solutions to meet our clients' unique needs. We understand the critical nature of sewage evacuation in environmental management and infrastructure maintenance.

Our approach involves conducting thorough assessments to grasp the specific requirements and challenges of each project, including factors like location, infrastructure layout, volume, and environmental regulations. This allows us to develop efficient and customized sewage evacuation plans aimed at optimizing efficiency, minimizing disruptions, and ensuring compliance with regulatory standards.

Our solutions are designed for various settings, from industrial facilities to commercial complexes and residential communities, always prioritizing environmental responsibility. Our highly trained personnel adhere to strict safety protocols and industry standards, ensuring a seamless and effective sewage evacuation process.

Our comprehensive services cover everything from initial assessment and planning to execution and ongoing maintenance. Leveraging cutting-edge technology and industry best practices, we deliver reliable and efficient sewage evacuation services.

11

## ABANDONMENT & DECOMMISSIONING SERVICES

Decommissioning and abandonment is a highly specialized activity that demands meticulous planning, advanced technology, and reliable expertise. At AAS FORTIS VOLUIT LTD, we deliver end-to-end decommissioning solutions designed to control costs, ensure site safety, protect the environment, and preserve your company's reputation.

Our team supports clients from end-of-field-life determination to final lease clearance, leveraging in-depth knowledge and cutting-edge resources to execute safe and efficient project closures whether for single wells, platforms, or large offshore facilities.

### OUR EXPERTISE

We provide comprehensive onshore and offshore decommissioning services, including:

- 1** Project Management & Engineering Support  
Development of tailored decommissioning strategies aligned with regulatory and operational requirements.
- 2** Well Plugging & Abandonment (P&A)  
Rig-less and subsea solutions for wells that have reached end-of-life or pose wellbore challenges.
- 3** Subsea Infrastructure Removal  
Pipelines, risers, spools, wellhead frames, and other subsea assets.
- 4** Platform & Floating Infrastructure Dismantling  
Topside and Jacket removal for fixed platforms; disconnection and towing of turrets, mid-water arches, and flowlines.
- 5** Marine Vessels & Equipment Provisioning  
Deployment of specialized vessels, subsea tools, and lifting equipment tailored to each decommissioning phase.
- 6** Site Remediation & Clearance  
Sump remediation, drill site restoration, and environmental clearance in full compliance with regulatory standards.
